The value of clinical research to the NHS, the UK economy and jobs market has been evaluated in the report **Impact and value of the NIHR Clinical Research Network (CRN)**. The report, shows that over a three year period, clinical research supported by the NIHR CRN generated an estimated £8bn and 47,467 full time equivalent jobs for the UK.

The report also provides an insight into the benefits and income that NHS providers gain through undertaking studies sponsored by life sciences companies and delivered alongside NHS care. The report estimates how much NHS providers save through using medicines provided as part of these commercial studies, where the company bears the cost of the medicine, in place of the standard NHS treatment.

In **NIHR Researchfish Update 2019** NIHR outline how this tool collects detailed information directly from NIHR-funded researchers, capturing research outputs, outcomes and impacts. Researchfish data is used in a variety of ways. The data extracted from Researchfish is currently being used in response to information requests and parliamentary questions, to develop impact case studies, and in impact assessment exercises such as the Efficacy and Mechanism Evaluation (EME) Programme, an MRC and NIHR partnership.

### Patient Safety

**Reports**

**Better strategies are needed to reduce preventable patient harm in healthcare.**
NIHR Dissemination Centre; 2019.
[discover.dc.nihr.ac.uk/content/signal-000825/better-strategies-are-needed-to-reduce-preventable-patient-harm](http://discover.dc.nihr.ac.uk/content/signal-000825/better-strategies-are-needed-to-reduce-preventable-patient-harm)

[NIHR Signal. About 6% of patients in healthcare settings internationally experience harm that could have been prevented. Drug errors, therapeutic management incidents and incidents involving invasive clinical procedures are the most common causes of preventable patient harm.]

**Standing up for patient and public safety.**
Royal College of Nursing (RCN); 2019.
[https://www.rcn.org.uk/professional-development/publications/007-743](http://www.rcn.org.uk/professional-development/publications/007-743)

[This report describes the lack of clear roles, responsibilities and accountability for workforce planning and supply in England. This impacts upon patient safety and outcomes, and leads to a challenging working environment for staff.]

---

### Finance and Procurement

**Reports**

**Five Funding Priorities For The NHS.**
NHS Confederation; 2019.
[https://www.nhsconfed.org/resources/2019/09/five-funding-priorities-for-health](http://www.nhsconfed.org/resources/2019/09/five-funding-priorities-for-health)

[The NHS Confederation has published this briefing ahead of the 2019 Spending Round.]

**Where does the 2019 Spending Round leave health and social care, and the nation’s health prospects?**
The Health Foundation; 2019.

[The Chancellor stated that the 2019 Spending Round 'turned the page on austerity', with an overall increase in departmental spending of 4.1%. But with investment in the services and infrastructure needed for people to lead healthy lives at rock bottom, the question is whether the new spending is enough – and in the right places.]

---

Full instruction to register for an NHS OpenAthens username and password at:
Health infrastructure plan.
Department of Health and Social Care; 2019.
[The plan sets out a 5-year programme of investment in health infrastructure.]

Investment in General Practice, 2014/15 to 2018/19, England, Wales, Northern Ireland and Scotland.
[This report details the investment in General Practice and the reimbursement for drugs dispensed in General Practices from 2014/15 to 2018/19.]

The 'make do and mend' health service: Solving the NHS' capital crisis.
Institute for Public Policy Research (IPPR); 2019.
[This report finds that, compared with similarly advanced economies, the NHS has had historically low levels of capital investment. The report recommends a new settlement to fund capital and support transformation totalling £5.6 billion per year – an 80 per cent uplift.]

The NHS and future free trade agreements.
NHS Confederation; 2019.
[This report assesses the impact on the NHS of future trade deals after Brexit and argues that the impact of trade deals should be assessed to ensure that commercial advantage is not prioritised at the expense of human and economic health.]

Guidelines

Using online consultations in primary care: implementation toolkit.

[This online consultation toolkit is an interactive document that provides a range of ideas and options for different professionals, including clinicians, at different points in their implementation journey.]

Reports

Designing digital skills interventions for older people.
Good Things Foundation; 2019.
https://digital-health-lab.org/older-people

[This report brings together recommendations for designing digital skills interventions for older people with care and support needs. It draws on insights from two pathfinder projects.]

Investigation into electronic prescribing and medicines administration systems and safe discharge.
Healthcare Safety Investigation Branch; 2019.

[HSIB has identified a significant safety risk posed by the communication and transfer of information between secondary care, primary care and community pharmacy relating to medicines at the time of hospital discharge.]

Local government social care data standards and interoperability.
Local Government Association (LGA); 2019.

[Around the country many councils are working with people, providers of care, the voluntary and community sector and health partners to ensure that information is shared, and people’s needs met. In this paper you will read examples of where councils and other partners are working together to make this happen.]

Text message reminders increase attendance at NHS health checks.
NIHR Dissemination Centre; 2019.
https://discover.dc.nihr.ac.uk/content/signal-000819/nhs-health-check-attendance-improves-with-text-reminders

[NIHR Signal. Sending text messages reminding people to book their NHS health check following their invitation letter increases attendance. There is little evidence to support pre-notification text messages telling people an invitation would soon be sent.]

Transforming care through technology – a toolkit for new models of outpatient care
The Shelford Group; 2019.

[The emergence of new models of care using technology is a key theme of the work of the Shelford Group transformation directors. This toolkit outlines examples of how Shelford Group trusts are using technology and digital innovations to transform outpatient services in the NHS.]

Harnessing data and technology for public health: five challenges: Responding to the government’s prevention green paper.
The Health Foundation; 2019.

[In this report the Health Foundation sets out five challenges that the government needs to address if it is to harness the full potential of data and technology in public health, and offer a suggestion to help address each.]

Patient Experience

Reports

The politics of health: what do the public think about the NHS?
The King’s Fund; 2019.

["In advance of the 2017 election The King’s Fund published an article on the politics of health, exploring the role the NHS might play at the ballot box, how satisfied people were with the service and what was driving this. As we head, in somewhat chaotic fashion, towards another general election we thought it would be timely to revisit that article, to once again ask where is the public on the NHS? And what, if anything, has changed?"]

This annual collection is a count of written complaints made by (or on behalf of) patients, received between 1 April 2018 and 31 March 2019.

Guidance: Handbook to the NHS Constitution for England
Public Health England (PHE); 2019.

Information about the rights and pledges in the NHS Constitution and what these mean for NHS patients and staff.

https://www.patientlibrary.net/cgi-bin/library.cgi?page=Services_Publications

This annual report summarises a year’s worth of patient experience surveys, and draws out key themes from wider research.

Service Design and Commissioning

Guidelines

NHS Improvement; 2019.

Advice for trusts to ensure that their approach to job planning for allied health professionals (AHPs) is consistent with best practice.

Reports

How healthcare providers can prepare for Brexit.
Department of Health and Social Care; 2019.
https://www.gov.uk/guidance/how-healthcare-providers-can-prepare-for-brexit

What providers and commissioners of healthcare services can do to manage the risks of a no-deal Brexit.

Excellent Care at the Heart of the Community: workforce strategy 2019-2022.
Sussex Community NHS Foundation Trust; 2019.

This document sets out how we will achieve our aim to deliver excellent care at the heart of the community by nurturing a thriving workforce and making the Trust a great place to work.

The community mental health framework for adults and older adults.

The Community Mental Health Framework describes how the Long Term Plan’s vision for a place-based community mental health model can be realised, and how community services should modernise to offer whole-person, whole-population health approaches, aligned with the new Primary Care Networks.

Delivering general practice with too few GPs.
Nuffield Trust; 2019.

With an increasing number of GPs leaving clinical practice or working part time, and many practices unable to fill vacant GP posts, this briefing presents some ideas on how general practice can continue to be provided as the shortage of GPs becomes chronic.

Is the NHS being privatised?
The King’s Fund; 2019.

Provided that patients receive care that it is timely and free at the point of use, the King’s Fund view is that the provider of a service is less important than the quality and efficiency of the care they deliver.

Library Services has purchased a number of exam preparation resources for doctors in training
For details go to: www.bsuh.nhs.uk/library/accessing-information/study-for-exams/
NHS Improvement; 2019.
https://improvement.nhs.uk/resources/nhs-oversight-framework-201920/
[The NHS Oversight Framework for 2019/20 outlines the joint approach NHS England and NHS Improvement will take to oversee organisational performance and identify where commissioners and providers may need support.]

NHS regulation and oversight: a time of transition.
NHS Providers; 2019.
https://nhsproviders.org/regulation-survey-2019
[New report outlines the findings from the fifth NHS Providers regulation survey and explores trusts’ experiences of regulation over the last 12 months.]

Review of Patient Transport Services
Healthwatch; 2019.
[This briefing highlights what the public are saying about issues they face when it comes to travelling to and from NHS services, including issues with public transport, parking and Non-Emergency Patient Transport Services (PTS).]

The NHS’s recommendations to Government and Parliament for an NHS Bill.
[The NHS long-term plan included suggested changes to the law to help implement the plan. This document sets out the NHS response to the views it received during engagement and sets out its recommendations to government and parliament for an NHS Bill.]

The state of the NHS provider sector: October 2019.
NHS Providers; 2019.
[This new report provides an overview of how the sector is performing and explores the challenges it faces as providers work towards delivering the NHS long term plan.]

Who cares? Financialisation in social care.
Institute for Public Policy Research (IPPR); 2019.
[The report finds that the private sector now provides 84 per cent of beds for people needing residential social care, up from an estimated 82 per cent in 2015. It also finds that larger providers are becoming more dominant. It concludes that a growing reliance on private provision could mean lower-quality care.]

Analysis of inspection reports: A report for the General Pharmaceutical Council
General Pharmaceutical Council (GPhC); 2019.
https://inspections.pharmacyregulation.org/inspection-reports/learning-from-inspections
[The report looks at potential uses of inspection data in predicting pharmacy performance and identifying good practice.]

Measuring Outcomes and Performance

Reports
Combined Performance Summary: August–September 2019: Monthly round-up of the latest NHS performance data.
Nuffield Trust; 2019.
[In September 2019, 14.6% of people attending A&E spent more than 4 hours from arrival to admission, transfer or discharge – the worst performance for any September on record; The proportion of people waiting over 18 weeks to start elective treatment reached 15% in August 2019 – the highest level since September 2008; The 62-day cancer target has only been met once in the last five years.]
The elective care system is under increasing pressure. Hospital outpatient visits have nearly doubled over the past decade, from 54 to 94 million. Waiting times for elective treatment are the worst they have been since 2009, as hospitals have had to prioritise the growing demand for emergency care.

The NHS Oversight Framework for 2019/20 outlines the joint approach NHS England and NHS Improvement will take to oversee organisational performance and identify where commissioners and providers may need support.

The first report in a new series explores how trusts have responded to feedback from Care Quality Commission in a positive and systematic way, encouraging ideas that have made a difference.

This report includes analysis of more than 123 million outpatient appointments recorded in HES data during the 12 month period. A number of breakdowns are provided including by patient's age, gender, whether the appointment was attended or not and by provider.

Since August 2010, the NHS has been responsible for the majority of delayed transfers of care. In August 2019, the NHS was responsible for 60% of patients delayed, social care was responsible for 30% of patients delayed, and both the NHS and social care combined were responsible for 9% of patients delayed.

There is marked geographical variation in the proportion of people dying at their usual place of residence, although all regions show similar trends in improvement over time. In 2018, London had the lowest proportion of people dying at their usual place of residence (39%) while the South West had the highest proportion (54%).

Between 2013/14 and 2017/18, the number of 30-day emergency readmissions to hospital in England increased by 15%, from 758,955 to 869,155. The total number of emergency admissions increased by 4% over the same time period, from 6,114,080 to 6,528,335.

The measure of success is the proportion of people aged 65 and over who are still at home 91 days after discharge from hospital into reablement services. The proportion of older people still at home after 91 days has varied little over time, reaching 82% in 2018-19.
Alert 99                                                                                               September/October 2019

Conducting Research

Articles

Evaluating the implications of Brexit for research collaboration and policy: a network analysis and simulation study.

Events

[The aim of this symposium is: to promote, teach and discuss research with health professionals from all disciplines. Registration is free but places are limited.]
Audrey Emerton Building, RSCH, Brighton All day event on: 16th December, 2019

**Personal well-being in the UK: April 2018 to March 2019.**
Office for National Statistics (ONS); 2019.

[Estimates of life satisfaction, feeling that the things done in life are worthwhile, happiness and anxiety at the UK, country, regional, county and local authority level.]

**What Good Looks Like.**
Association of Directors of Public Health (ADPH) and Public Health England (PHE); 2019.
https://www.adph.org.uk/2019/06/what-good-looks-like/

[This series of publications set out the guiding principles of ‘what good quality looks like’ for population health programmes in local systems.]

**Healthy, prosperous lives for all: the European Health Equity Status Report (2019)**
WHO Regional Office for Europe; 2019.

[This report identifies five essential conditions needed to create and sustain a healthy life for all. It also considers the drivers of health equity to create more equitable societies: policy coherence, accountability, social participation and empowerment.]

**A health index for England: opportunities and challenges: Responding to the government’s prevention green paper.**
The Health Foundation; 2019.

[In this report the Health Foundation explore the government's proposal to make health a core measure of government success by creating a national health index for England.]

**Creating healthy places: perspectives from NHS England’s Healthy New Towns programme.**
The King's Fund; 2019.
https://www.kingsfund.org.uk/publications/creating-healthy-places

[The report concludes by highlighting that there is significant potential to improve population health through place-making and community development.]

**Advancing our health: prevention in the 2020s consultation.**
The King's Fund; 2019.

[The King's Fund response to the government's consultation paper on prevention focuses on the additional areas they would like future government policy to cover.]

**Creating healthy lives: A whole-government approach to long-term investment in the nation’s health.**
The Health Foundation; 2019.
https://www.health.org.uk/publications/reports/creating-healthy-lives

[Health Foundation recommend five shifts in the government’s overall approach to achieving this aim and outline how investment can be rebalanced towards areas of spending that maintain and improve health, such as early years services, housing and social security.]

**State of the nation 2019: children and young people's wellbeing.**
Department for Education (DfE); 2019.

[This report evaluates wellbeing in children and young people, including: statistics on the wellbeing of children and young people in England; wider indicators on their happiness with their relationships, self-reported health and experiences with school; an in-depth analysis of psychological wellbeing in teenage girls.]
**KnowledgeShare: Update your knowledge, share your knowledge**

**What is KnowledgeShare?**
KnowledgeShare makes it easier to access personalised resources and services from the Library and Knowledge Service. The library service uses KnowledgeShare to provide services to you (including search requests, information skills teaching and evidence updates) and you can log in with your NHS OpenAthens account to access these services directly.

We are committed to safeguarding your information. The information you supply will be used to contact you about services or resources you have requested from the Library and Knowledge Service. For further information on how we keep your information secure, and your rights to access it, read the full KnowledgeShare Privacy Policy.

**How do I access it?**
You can log into KnowledgeShare with your NHS OpenAthens account at [www.knowledgeshare.nhs.uk](http://www.knowledgeshare.nhs.uk). If you don’t have an NHS OpenAthens account, you can register at [https://openathens.nice.org.uk](https://openathens.nice.org.uk).

**How do I unsubscribe from this newsletter?**
- To unsubscribe from this newsletter and update other user setting select ‘Your Profile’ and click edit in the top right of the Settings box. Uncheck the box next to ‘Send me news and bulletins from my Library and Knowledge Service’.

**What can I do with KnowledgeShare?**
- **Receive personalised updates.** Add your professional interests to KnowledgeShare – being as broad or specific as you like – and we will send you email updates about high-impact publications that match your interests. We aim to keep you up-to-date without overwhelming you with information.

- **See previous email updates.** Refer back to previous update email with links to the publications that have matched your interests. Select ‘My Update Emails’ from the update menu to see a list of emails.

All of these features can be customised. Making your contact details, interests and searches visible to all members of KnowledgeShare promotes knowledge sharing and collaboration, but you can also choose to restrict visibility to your organisation or to Library and Knowledge Service staff only.
