

# KnowledgeShare

## News from KnowledgeShare - March 2020

### How KnowledgeShare can support you during the coronavirus pandemic

#### Assigned Librarians can change their email address

If your LKS team is working with reduced staffing you can streamline emails from members who have replied to evidence updates. Simply change the email address of your assigned librarian(s) to your LKS generic email address, or the address of a team member providing cover.

#### Ask your members if they would like Covid-19 added to their professional interests

Many members won't have Covid-19 in their list of interests but may still wish to receive the latest on the outbreak. We recommend adding the following paragraph to your current awareness email template:

"A regularly updated list of Covid-19 publications can be found at [www.knowledgeshare.nhs.uk/coronavirus\\_infections](http://www.knowledgeshare.nhs.uk/coronavirus_infections). If you would like to have Covid-19 added to your own interests, or to increase the frequency of updates, please let me know."

The list of Covid-10 resources doesn't require an OpenAthens account. It lists publications added to KnowledgeShare in date order.

#### Tell your members about changes to service provision or [opening hours](#)

You could also consider using the current awareness emails to share information about any closures and changes to your libraries' opening times.

**If your assigned librarians would like to add additional text to their personal level current awareness templates see section 3.2.1.3 in the KS handbook Updates 'Edit a personal level email template' (<https://www.bsuh.nhs.uk/library/knowledgeshare-web/>).**

**If you would like us to add text to your team's current awareness templates for you, just send the wording you would like to [bsuh.knowledgeshare@nhs.net](mailto:bsuh.knowledgeshare@nhs.net).**

## How KnowledgeShare can support you during the coronavirus pandemic

### Share and see other teams' evidence searches

Covid-19 searches are gradually building up on KnowledgeShare and we are working on a way to make the reports visible to non-subscribers.

If you are a subscriber to KnowledgeShare but are not yet using the system to collate your search results, please consider doing so as it will aid in sharing with other teams. We can support people who wish to start using this. Join the Evidence Search online demonstration on Mon 27 April 2020 or contact [bsuh.knowledgeshare@nhs.net](mailto:bsuh.knowledgeshare@nhs.net).

Drugs used for COVID-19 (inc. Fabipravir, Hydroxychloroquine, Remdesivir, etc.)  
undefined

"I have used the information from KnowledgeShare updates to inform how an anxiety group for young people will be run. The evidence has focussed on specific manualised approaches and their results with different age groups and difficulties, and then compared to individual work. It has been very useful!"

**Allied Health Professional,  
Sussex Partnership NHS Foundation  
Trust.**

## Upcoming training and events

### Skills

**23 April 2020 2.00—3.30pm**

This online demonstration will give you the ability to manage information skills teaching with KnowledgeShare, including either *ad hoc* teaching or scheduled sessions.

### Evidence Search

**27 April 2.00—3.30pm**

This online demonstration will give you the skills to manage evidence searching with KnowledgeShare.
