## New category spotlight

**Child Development** and **Parenting**. These categories have been added to support members who work in health visiting, community child health, public health/health promotion and family support.

Use **Child Development** for all aspects of early years growth such as infant feeding and weaning (see also **Breast Feeding**), height and weight monitoring, toilet training, sleep etc. See also **Developmental Disorders**.

Use **Parenting** for interventions to support parents. Common childhood conditions also have their own categories, for example **Infantile Colic**, **Asthma**, **Otitis** and (new) **Whooping Cough**.

## Support service over Christmas

The KnowledgeShare elves will be taking a well-earned break over Christmas!

Our support desk will be closed from Friday 25 December 2020 to Friday 1st January 2021.

We will, of course, be on the lookout for any major problems that need a resolution.
