		SC [Single Crew]	1 Crew, Ambulance Care Assistant. No attendant Required. Patient can transfer to a seat in the Vehicle. Suitable for patients who self-administer Oxygen.
		TIC1 [Travel in chair with single crew]	1 Crew, Ambulance Care Assistant, no attendant required. Patient requires to travel in Wheelchair. Please confirm patient's wheelchair is crash tested and select Travel in Own Chair (Crash Tested) tick box under Travel Requirements. For patients travelling in Electric Wheelchair please select Electric Wheelchair tick box under Travel Requirements. Suitable for patient who self-administer Oxygen.
		TIC2 [Travel in chair with double crew]	2 Crew, Ambulance Care Assistants. Attendant required in back of resource to administer oxygen, etc. Please confirm patient's wheelchair is crash tested and select Travel in Own Chair (Crash Tested) tick box under Travel Requirements. For patients travelling in Electric Wheelchair please select Electric Wheelchair tick box under Travel Requirements.
		DC [Double crew]	2 Crew, Ambulance Care Assistants. Attendant required in back of resource to administer oxygen, etc. ** SCAS cannot provide wheelchairs for use during the journey **.
		STR [Stretcher]	2 Crew, Ambulance Care Assistants. Stretcher required. New patients travelling to or from a residential address will require Risk Assessments. Oxygen can be administered.

MOBILITY GUIDE - 'COMPLEX' JOURNEYS

We can also transport patients that have more complex requirements, such as the mobility restrictions in the table below. These transport requests cannot be booked online and need to be booked by phoning the Contact Centre on 0300 123 3235

Vehicle	Crew	Type	Description
		BP WC [Bariatric Patient - wheelchair]	2 Crew, Ambulance Care Assistants. Bariatric patient travelling in bariatric wheelchair. New patients travelling to or from a residential address will require Risk Assessments. Oxygen can be administered.
		BP STR [Bariatric patient - stretcher]	2 Crew, Ambulance Care Assistants. Bariatric patient travelling on bariatric stretcher. New patients travelling to or from a residential address will require Risk Assessments. Oxygen can be administered.
		MULTI CL [Multi crew lift]	Multi crew lift at home address requiring more than 2 crew members. Would require a Risk Assessment.
		ECC [Enhanced clinical care]	Providing an enhanced level of service to cover all the needs of high dependency patients, such as those with complex medical needs or infectious/communicable diseases, where a higher level of crew skills will be needed. Please note this is for routine movements and not urgent, critical or time specific movements.

Patients who wish to travel in their own wheelchair:

Patients can only travel in their own wheelchair if the make and model is compliant with International Organisation for Standardisation ISO 7176.

You will need this information at the time of booking. If you are unsure if the patient's wheelchair is ISO 7176 compliant, you or the patient will need to contact the manufacturer.

If you are unable to confirm whether the patient's wheelchair is ISO 7176 compliant, the patient will need to be transferred to a compliant SCAS NEPTS wheelchair (if possible) for their journey.
