

Vestibular and Cawthorn Cooksey Exercises

What are the aims of the exercises?

- Relaxing the neck and shoulder muscles
- Training the eyes to move independently of the head
- Practising good balance in everyday situations
- Practising the head movements that cause dizziness (to help the development of vestibular compensation)
- Improving general co-ordination
- Encouraging natural spontaneous movement.

Exercises

- Make sure that you are in a safe environment before you start any of the exercises to reduce the risk of injury.
- All exercises should be performed slowly to begin with and gradually progress to faster movements.
- Exercises should be performed 3 times a day.

Level 1

Eye movements (head kept still)

- a Look up then down, slowly at first, then rapidly 20 times
- b As above but side to side.

- c Focus on fingers at arm's length. Maintain focus while moving fingers towards nose and away again 20 times.

Level 2

Head and eye movements (sitting)

a Bend head forwards and backwards (eyes open). Do this slowly then quickly.

b As above. Rotating to the left and then to the right.

c Repeat both of the above but with eyes closed.

Level 3

Arms and body movements (sitting)

a Shrug shoulders 20 times

b Circle shoulders 20 times

c Rotate to the right and then to the left, at waist (i.e: upper part of the body moves together) 20 times.

- d** Turn head side to side through full range of rotation, slowly.
- e** Repeat above doing two slow turns followed by one rapid turn.
- f** Repeat above followed after a couple of seconds pause, by three rapid turns.
- g** Repeat above turning with eyes closed.

Level 4

Arm and trunk movements (standing)

- a** Repeat all level 3
- b** Sit down and stand up 20 times with eyes open.
- c** Sit down and stand up 20 times with eyes closed.
